

## ***“Rising Feminine Retreat ~ March 2020”***

*“The universe is made up of successive graduations of good, with matter at the lowest end of the scale, spirit at the highest, and beauty being the developing state of harmony between them - the area of resonance often referred to as the soul. The soul of anything is, therefore, by definition, beautiful: it is beauty itself, the point of tension between unity and diversity, the interface between the manifest and the unmanifest, between spirit and matter that are transmissions coming from the soul through the animating feminine. These forces heal and uplift those it’s presence touches.*

*She is deeply intuitive, receptive, flowing, relational, resonant, healing, unifying and agency of beauty and grace. Her body is sharply attuned as well as spiritually attuned to the rhythms of the natural world and the birthing of new forms. She particularly our Great Mother Earth, the Moon, Venus and Neptune. She is the illuminating power that gives life its sacred source of meaning and real wisdom of life.*
